### "Boat Building" and MORE, School Opportunity

Char-Em ISD in partnership with the Michigan School of Boat Building and Marine Technology will offer to a select group of local juniors and seniors (15 total), a rare opportunity to participate in the Michigan School's Introduction to Composites program. This program will teach students to identify and utilize the materials and building methods used to manufacture exciting high-tech products such as performance boats, aircraft, wind turbine blades, and Formula 1 cars.

A pilot program will begin January 23, 2012 and end in June which will lay the groundwork for participation in the program beginning in September 2012.

If this is something your son/daughter is interested in attending. Please contact Jill Patton-Towne with questions: 231-549-2211 x207
